Greetings!

When starting Mate Terminal and the default fish shell, I am presented with this:

Welcome to fish, the friendly interactive shell
will@ghostbsd /u/h/will>

The last part of the prompt is showing shell variables instead of their values.

I cannot find where this is set, but it almost looks like quoting may be necessary when setting PS1.

Thanks!

History

#1 - 04/17/2019 02:15 PM - ericbsd
- Status changed from New to Rejected
- Target version deleted (GhostBSD 19.04)

It is working as expected and if there is any change a user what to make here the documentation [https://fishshell.com/docs/current/](https://fishshell.com/docs/current/) and for help visit [https://forums.ghostbsd.org/index.php](https://forums.ghostbsd.org/index.php). It is not a bug.
