**Estimated time:** 0.00 hour

---

**Description**

Restarting the ntpdate service in the terminal hangs towards the end, as shows in the attached screenshot. The only way to exit the process is to close the terminal.

---

#### History

**#1 - 11/30/2019 04:46 PM - ericbsd**

From your picture, it did not hang it the print got your next command to input. Basically, if you press enter you will have a new line to input.

---

**#2 - 11/30/2019 04:47 PM - ericbsd**

- Status changed from New to Rejected

---

I will not try to fix this.
