### Description

I'm trying to install from DVD. It boots to GRUB, then fails to boot the installer. Below is the output:

ACPI BIOS Error (bug): A valid RSDP was not found (20170303/tbxroot-369)

panic: running without device atpic requires a local APIC

cpuid = 0

Still waiting for feedback.

#### #4 - 03/12/2019 02:21 PM - ericbsd

- Status changed from Feedback to Closed

Due to the lack of feedback and that we don't use grub anymore I am closing this.
